Hundred Sudoku by Bill Murphy

Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). The numbers in each gray two-cell pill form a two-digit number, read from left to right. In each row containing two gray pills, the sum of the two-digit numbers is 100. (E.g., if R2C1 and R2C2 contain 5 and 7 respectively, then R2C8 and R2C9 must contain 4 and 3 as 57 + 43 = 100.)
